

## **Applications**

Simple and multi-metallic oxides Metals, nitrides and alloys III-V, wide band gap semiconductors 2D and 3D materials Etc.

The Annealsys MC-050 system is a 2-inch DLI-CVD / DLI-ALD reactor developed to meet the requirements of research and development units.

The infrared lamp furnace in association with the direct liquid injection vaporizers provide unique multi process capabilities inside the same process chamber: CVD, ALD, MOCVD, RTP and RTCVD.

The Direct Liquid Injection (DLI) vaporizers provide perfect control of precursor flow and allow utilization of low vapor pressure and diluted chemical precursors. The fast switching of the precursor vapor flows associated with the by-pass valve provide perfect interface control for deposition of nanolaminates.

The MC-050 is the perfect machine for the development of new materials and nanolaminates using the widest range of solid and liquid organometallic precursors.

Substrate size

Quartz tube with water cooled stainless steel flanges

Infrared lamp heating system

Counter tube for easy cleaning of the process chamber

Temperature range From room temperature up to 1100°C

Temperature control

Temperature control

Fast digital PID / RTP temperature controller

Up to 6 direct liquid injection vaporizers

State of the art liquid panels with full rising capability
Up to 8 process gas lines with digital mass flow controllers
Vacuum valve, vacuum gauge and automatic pressure control

Full PC control, up to 400 operations or loops per recipe Human interface designed in respect of SEMI E95-0200

Full data logging and process historicals

## **Optional features**

Control

Vapors, gas and vacuum

Pyrometer temperature control Rough vacuum pump, Turbo pump Glove box interface and glove box Remote plasma Ozone generator

## **Customer support**

Outstanding customer support for hardware, software and process
Efficient remote support using software diagnostic capabilities
High expertise in CVD / ALD processes and of chemical precursors of our process engineers
Capability to support customer for process optimization

## **Physical specifications**

Voltage: 3x400V+N+Gr / 3x220V+Gr

Power: 21 kW

Facilities Water : 2 to 4 bars, pressure drop 1 bar, 8 l/mn

Compressed air : 6 bars (valve actuation)

Process gas fittings: VCR 1/4

Width 955 mm 37.6"
Dimensions and weight Depth 1,604 mm 63.2"

Height 1,812 mm 71.4"
Mass 400 kg 882 lbs

139 rue des Walkyries 34000 Montpellier - FRANCE
