

## Annealsys appoints Hightec Systems Corporation as distributor in Japan

Montpellier, France, December 14, 2015

Annealsys is pleased to announce a Distributor agreement with **Hightec Systems Corporation** for the sales and service of Rapid Thermal Processing (RTP) and Direct Liquid Injection CVD and ALD systems in Japan.

Annealsys Rapid Thermal Processing systems have been designed to offer a wide range of process capabilities from annealing (RTA) to chemical vapor deposition (RTCVD). The cold wall chamber technology and reactor designs offer a number of advantages: high process reproducibility, low memory effect, high cooling rates, low temperature pyrometer control, ultra clean environment, atmospheric and standard vacuum capability.

Annealsys DLI-CVD / DLI-ALD machines are equipped with direct liquid injection vaporizers for the utilization of the widest range of chemicals including low vapor pressure and thermally unstable precursors. These machines offer multi process capability inside the same process chamber: CVD, ALD, MOCVD, pulse pressure CVD, RTP, RTCVD. These unique features offer unlimited capabilities for the development of new materials.

The association of Annealsys experience and leading market position in RTP and DLI systems with Hightec Systems Corporation experience and customer support is providing high performance and high quality systems and customer support for process development and manufacturing to Japanese laboratories and companies.

### **About Annealsys:**

Annealsys is a leading manufacturer of RTP and DLI-CVD / DLI-ALD systems for research and niche production applications in the fields of silicon and compound semiconductors, nanotechnologies, MEMS, solar cells, glass, etc. Annealsys has developed a range of RTP systems with high temperature and high vacuum capabilities and some unique features like the fast cooling system. Direct Liquid Injection (DLI) CVD and ALD systems offer the highest process versatility for development of new materials. Visit Annealsys web site at [www.annealsys.com](http://www.annealsys.com)

### **About Hightec Systems Corporation:**

Hightec Systems Corporation is a unique trading company of brand-new and used process equipment systems for research and production applications in the field of silicon and compound semiconductors, displays, electric components, etc. Hightec Systems are also doing not only sales activities of process equipment but also technical support and consulting for production lines of semiconductors, electric components and displays.
