

## Annealsys appoints Deam as distributor in Italy

Montpellier, France, May 2<sup>nd</sup> 2016

Annealsys is pleased to announce a Distributor agreement with **Deam** for the sales of our Rapid Thermal Processing (RTP) and Direct Liquid Injection CVD and ALD deposition systems in Italy.

Annealsys Rapid Thermal Processing systems have been designed to offer a wide range of process capabilities from annealing (RTA) to chemical vapor deposition (RTCVD). The cold wall chamber technology and reactor designs offer a number of advantages: high process reproducibility, low memory effect, high cooling rates, low temperature pyrometer control, ultra clean environment, atmospheric and standard vacuum capability.

Annealsys DLI-CVD / DLI-ALD machines are equipped with direct liquid injection vaporizers for the utilization of the widest range of chemicals including low vapor pressure and thermally unstable precursors. These machines offer multi process capability inside the same process chamber: CVD, ALD, MOCVD, pulse pressure CVD including RTP and RTCVD for the MC050. These unique features offer unlimited capabilities for the development of new materials.

The association of Annealsys experience and leading market position in RTP and DLI systems with Deam knowledge of the Italian market is providing high performance and high quality systems and customer support for process development and manufacturing to Italian laboratories and companies.

### **About Annealsys:**

Annealsys is a leading manufacturer of RTP and DLI-CVD / DLI-ALD systems for research and niche production applications in the fields of silicon and compound semiconductors, nanotechnologies, MEMS, solar cells, glass, etc. Annealsys has developed a range of RTP systems with high temperature and high vacuum capabilities and some unique features like the fast cooling system. Direct Liquid Injection (DLI) CVD and ALD systems offer the highest process versatility for development of new materials. Visit Annealsys web site at [www.annealsys.com](http://www.annealsys.com)

### **About Deam:**

Deam is an Italian consulting company specialized in sales, marketing and logistic of high technology products. Its main expertise is in the semiconductor, MEMS, micro and nano technology and solar markets. Deam activities cover market studies, business plan preparation, search of agents, direct sales and import-export tasks. Contact Deam at [info@deamconsulting.com](mailto:info@deamconsulting.com)
