

Annealsys moves to new facilities in Montpellier

Montpellier, France, July 29, 2016

Annealsys is pleased to announce that moving to new facilities has been completed on July 29th. We will be operating from our new location starting on August 1st, 2016. The new 1,000 sqm building is a realization of the French company Creatimmo. It is designed to better serve our customers with extended offices, larger assembly workshop and a new dedicated room for our R&D laboratory and demo machines.

The three times larger facilities compared to our previous location were necessary to increase our manufacturing capability to strengthen our leadership position on Rapid Thermal Processing machines and the development of our Direct Liquid Injection deposition systems.

Please note our new address:

**139 rue des Walkyries
34000 Montpellier
France**

Phone and fax numbers as well as contact email remain the same:

Phone: +33 467 20 23 63
Fax: +33 467 20 26 89
Email: sales@annealsys.com

About Annealsys:

Annealsys is a leading manufacturer of RTP and DLI-CVD / DLI-ALD systems for research and niche production applications in the fields of silicon and compound semiconductors, nanotechnologies, MEMS, solar cells, glass, etc. Annealsys has developed a range of RTP systems with high temperature and high vacuum capabilities and some unique features like the fast cooling system. Direct Liquid Injection (DLI) CVD and ALD systems offer the highest process versatility for development of new materials. Visit Annealsys web site at www.annealsys.com
