

Jipelec and Annealsys RTP merging

Montpellier, France, June 27, 2022

Since ECM Group has completed the acquisition of the company Annealsys, we have worked to merge the Jipelec and Annealsys RTP (Rapid Thermal Processing) product range.

Today there are about 700 Jipelec RTP systems installed worldwide with mainly the most famous product of the range, which is the JetFirst with 100, 200 and 300 mm versions.

Founded in 2004, Annealsys with more than 350 machines installed in 45 countries, is a leading manufacturer of Rapid Thermal Processing (RTP) and Direct Liquid Injection Deposition systems.

Starting from July 1st 2022, the manufacturing and the service will be handle by Annealsys in order to provide the most efficient organization to serve Jipelec and Annealsys customers.

The Jipelec RTP systems are entry-level RTP systems while Annealsys tools are high end RTP with possible SEMI S2 and S8 certification.

For future inquiries, please contact:

- Sales: sales@annealsys.com
- Service: support@annealsys.com

Our philosophy involves building up a long-term relationship with our customers, providing high reliability and high quality tools, insuring low cost of ownership and offering outstanding customer support and service. To achieve this, we have created a worldwide network with trained engineers for sales and service.
